#### Color Laser Printer, Network - Samsung CLP-775ND

CLP-775ND. Samsung has incorporated a powerful 600MHz dual core processor in order to deliver the best possible data processing speed – printing up to 33ppm (A4) taking only 11 seconds to process first page of each job through to output, including even large color documents. 9600 x 600dpi; Its improved anti-jam technology also reduces the chance of paper jams by 50% from previous models. Important documents can easily end up in the wrong hands, especially when work printers are shared among many users. With Secure Printing you can now keep your documents safe from prying eyes using a pin code, which prevents your documents from being printed until it has been entered. The CLP-775ND comes with a 1GB Ethernet network connection as standard, allowing the printer to be conveniently connected to a high-speed, high-volume network. All Samsung printers are available at a discount by going to the IEC website and selecting "AV & Computer".
